

USPeptideRx

PROCUREMENT · FULFILLMENT · TELEHEALTH

Strategic Supply Partnership

Research-use compounds, 503B office-stock, 503A patient-specific Rx, and cash-pay telehealth brands — supplied and operated on one set of rails for licensed clinics and partners.

RESEARCH · 503B OFFICE-STOCK · 503A PATIENT-RX · TELEHEALTH

01

One partner across every tier.

USPeptideRx is the procurement layer between your practice and a national network of state-licensed 503A compounding pharmacies and FDA-registered 503B outsourcing facilities.

The relationship

Immediate access to the formulary, account-specific pricing, and a dedicated rep — with fulfillment, routing, and the prescribing workflow handled on our rails.

The commercial goal

Give your clinic a clear catalog and cost basis while we handle sourcing, testing standards, pharmacy routing, fulfillment, and order status — one PO, one invoice, one tracking number.

CORE POSITION

You focus on patients and demand. We operate the supply layer — research channel, office-stock, patient-Rx, and the telehealth brand engine — without you building any infrastructure.

Licensed-only

Built for licensed clinics and serious partners, not an open marketplace.

Account-specific

Formulary, pricing, and terms are provisioned per account, by hand.

Operationally ready

Orders move through routing and fulfillment from day one.

02

Four tiers. One account.

01

RESEARCH-USE ONLY

Research compounds

RUO compounds through our research channel — for laboratory and research use only. Not a drug, not for human use, kept fully separate from the clinical supply.

Research entity · lab use only

02

503B · OFFICE STOCK

Stock your practice

Bulk-compounded by an FDA-registered 503B outsourcing facility in the US. Ordered as clinic inventory and administered in-office — no patient-specific prescription required.

Ships to the clinic as inventory

03

503A · PATIENT RX

Prescribe to your patients

Patient-specific compounding, fulfilled per prescription and shipped to the patient. Your own provider writes it — or a licensed provider in our telehealth network handles the visit.

Per-patient · pharmacy is merchant of record

04

TELEHEALTH · BUILT FOR YOU

Launch a telehealth brand

We stand up a cash-pay telehealth brand on our rails — site, intake, provider network, fulfillment. We run it for you on revenue share, or partner and co-own it with you.

Built with you · structure set at onboarding

Research-use-only compounds are not drugs and are not for human or veterinary use. 503B office-stock items are compounded for in-office administration and do not require a patient-specific prescription; 503A items are patient-specific compounded prescriptions dispensed per patient. Compounded medications are not FDA-approved products. Item availability varies by state and by pharmacy.

From application to fulfilled order.

1

Apply

Two-minute application; we verify your license by hand.

2

Set up

Formulary access, account pricing, and your dedicated rep — usually one business day.

3

Order

Prescribe to patients or stock eligible 503B items in-office.

4

We route

Each order goes to the right pharmacy for price and availability.

5

Fulfilled

Ships to the patient or to your clinic. One PO, one invoice.

Commercial scope

Clinic pricing includes sourcing, pharmacy routing, order coordination, and account support. Patient-Rx items are transacted by the pharmacy as merchant of record; office-stock is invoiced per order.

Partnership alignment

Your team focuses on patients and growth; our system handles the operational layer — and when you're ready, we stand up a telehealth brand of your own on the same rails.

OPERATING PRINCIPLE

Wholesale economics and turnkey operations — without the clinic building inventory, pharmacy relationships, or fulfillment infrastructure.

Launch a telehealth brand on our rails.

Done-for-you

Custom quote

A full custom telehealth company built for you — branded site, patient intake, provider network, and pharmacy fulfillment. You own it outright; we operate the back end.

Launch partnership

Low upfront + rev share

A small launch fee to stand up your brand, then a shared-upside partnership going forward — same rails underneath.

Next steps

- 1 Apply**
uspeptiderx.com/start — two minutes; we verify your license by hand.
- 2 Account setup**
Formulary access, account-specific pricing, dedicated rep — usually one business day.
- 3 First order**
Prescribe to patients or stock eligible items in-office. We route and fulfill.

USPeptideRx. Clinic pricing is account-specific and may vary after approval. Research-use-only items are for laboratory research use, are not for human consumption, and are sold through the research channel. Compounded medications are not FDA-approved products and are dispensed only against a valid prescription where a licensed provider determines it is appropriate.
