

TELEHEALTH · BUILT FOR YOU

Launch a telehealth brand

A cash-pay telehealth brand, built for you or co-owned.

For partners with an audience who want their own cash-pay brand.

If you have an audience, we stand up a cash-pay telehealth brand on our rails — a branded site, patient intake, a provider network, and pharmacy fulfillment, all wired together. You own the brand and the patients; we run the back end.

Two ways to run it: we build and operate it for you on a revenue share, or we partner and co-own it with you. Either way the provider/PC structure is set up per state so the clinical side is compliant from day one.

WHAT WE STAND UP

Branded site + patient intake

Provider / PC structure per state

Pharmacy fulfillment

Billing + patient support

Built with you · structure set at onboarding

Licensed-only

Built for licensed clinics, labs, and serious partners — not an open marketplace.

Account-specific

Formulary, pricing, and terms provisioned per account, by hand.

One partner

Research, office-stock, patient-Rx, and telehealth on one set of rails.

02

How it works.

- 1 Map the brand**

We scope your audience, the menu (GLP-1 + peptide offerings), the brand, and the run model — build-for-you or co-own.
- 2 We stand it up**

Site, intake, provider network and per-state PC structure, and pharmacy fulfillment — built on our existing rails.
- 3 Launch & operate**

You drive the audience; we run intake, prescribing, fulfillment, billing, and support. Revenue share or co-ownership per the deal.
